PROJECTS

Expense Tracker:

I have made Expense Tracker with React.js. User can see his income, expense and also the remaining balance. Here user can add new transactions. There are 3 user inputs to add transaction information.

The user can able to see all his transactions in the transaction history. He can delete the transaction or even he can edit the transaction and it is having a chart to show all the data.

Quiz App:

I have created Quiz App using HTML, CSS, JavaScript. This app consists of multiple choice questions. We will get next question after submitting the previous one and at the last it will show the obtained marks.

Calculator:

I have used HTML, CSS and JavaScript for creating Calculator. I have implemented an interactive interface with buttons for addition, subtraction, multiplication, and division operations. It is also having display screen to show user input and results.
